

Albaraka Türk's "We Teach Coding to Our Children" Project Delivers Its First Graduates!

The Project " We Teach Coding to Our Children" organized by Albaraka Türk delivered its first graduates. Children who successfully completed the Coding Training were presented with certificates and gifts at the end of the 12-week program.

The coding training sessions started on February 2, 2022, and children were lectured on topics such as problem solving, algorithms, flow charts, variables, control structures, conditional actions and loops. Children had a fun start to Coding by developing games and animations through the training program the curriculum of which has been prepared by a total of eight instructors, including three in-house and five from Albaralakech Global. The certificates were presented to the children who effectively participated in the twelve-week training program at a ceremony attended by General Manager Malek Khodr Temsah, Assistant General Managers, directors and unit managers.

"I am very happy that we have fulfilled our obligations to our country, to our children and to our future."

Sharing his views on the project's first graduates, **Albaraka Turk Assistant General Manager Süleyman Çelik** noted, "As Albaraka Türk, we have always strived to fulfill the requirements of being a family, and we will continue to do so. One of these requirements, of course, is our investment in our children. The training programs to be organized constitute the backbone of our investments. Our main goal here is to equip our children well for the future. In this respect, our Department of Education and Career Management designed a qualified Coding Training. So we have had a good start towards our projects for our children. I would like to extend my congratulations to my colleagues who made a great contribution to the process and to our dear children who successfully completed the training. I would also like to express that I am very pleased that we have fulfilled our commitments to our country, our children and our future."

The goal is to empower children with the skills to catch up with modern times

Carried out by Albaraka Türk's Department of Education and Career Management, the project, which covers the bank employees' children, seeks to support their progress,

ensure that they are better equipped for the future, and provide them with the skills they need to catch up with modern times. The project, We Teach Coding to Our Children, is of great significance as it serves as an example for the realization of such projects in the future. Albaraka Türk plans to carry on its training projects in the coming period as well.
